

# INFINIUM DATA MIGRATION

## INFINIUM DATA MIGRATION AND INFINIUM HISTORICAL DATA

Circumstances change. Sometimes companies decide to migrate off their Infinium systems to other platforms to best reach their corporate goals. Big data changes can turn into giant headaches.

Overworked and understaffed IT departments may not have the time and/or experience to map Infinium data over to a new platform as a starting point. TCI is the Infinium data migration expert.

TCI has experience in mapping and moving Infinium data over to different platforms as the new data starting point. Our best practices knowledge of the Infinium files and how to map the data quickly and easily have made us the point person for many customers who were in this situation.

We have successfully completed Infinium HR/PY and Infinium Financials data mapping and transfer into the following:

Infinium to:	UltiPro	Lawson
	Oracle Cloud	Infor Cloud
	PeopleSoft	Ceridian
	SAP	Paychex
	ADP	Sage
	Microsoft Dynamics	ADP
	Workday	JD Edwards
	Ultipro	

Worried your files are too custom? We can take care of that too.

If you don't need the Infinium data mapped; possibly, you only need to have an easier way to access historical Infinium data without keeping Infinium running. TCI can export all historical Infinium data to an SQL database loaded on a PC. This allows for Infinium historical access while decommissioning the iSeries.

TCI has done data migration and historical data transfer for numerous companies, such as: Porsche Cars North America, Bob Evans, Morton Salt, and Nintendo.

Whatever your Infinium need is, TCI is here to help. Contact Jerry Daniel, Infinium Director, [jdaniel@tcipro.com](mailto:jdaniel@tcipro.com), 502.314.3733, for more information.
